NKOSINATHI NKOSI

ABOUT ME

Nkosinathi is a self-taught Front-End developer. He is currently doing his final year in Information Technology with Richfield Graduate Institute of Technology. His passion for Web Development using JavaScript was sparked by a Design internship he completed at the Johannesburg Centre for Software Engineering.

Nkosinathi has a willing to learn attitude, is always seeking more knowledge in the I.T industry and is a firm believer in never settling for less.

PROJECTS

YAKA BAGS WEBSITE DEVELOPMENT

Designed and developed the website with good SEO for a start-up company, co-founded by Mr Sivuyile Pezulu and Mr Romeo Nkosi. Yaka Bags offers premium kiddies backpacks, with personalized accessories. The website uses: HTML5, CSS3, and jQuery for animations. The website is responsive, from 480px screens to 1200px wide screens.

FINAL YEAR PROJECT: FAST 6 CAR RENTAL SYSTEM, 2019

Supervisor: Ms K Pamela (Lecturer)

The aim was to design and create a data management system for a car rental company. This enabled customers to rent a vehicle for temporal use over a specific period at a reasonable fee. The system was aimed at increasing customer retention and simplify logistics, vehicle and staff management.
